

MULTIFUNCTIONAL EMBODIED AI ELDERCARE ROBOT

Product Introduction

HIT-2X

AJJ & HUAXI

AJJ MEDTECH | SINGAPORE

AJJ Medtech is a Singapore-based medtech group. Combining healthcare market experience with medical technology expertise, AJJ focuses on local customer needs, market development and service coordination for HIT-2X in Singapore.

HUAXI | ROBOTICS & AI

HUAXI specialises in embodied AI, robotics and eldercare technology. Its expertise spans robotic perception, decision-making, multimodal AI models and intelligent interaction. HUAXI contributes product development and technical expertise to the HIT-2X collaboration.

WORKING TOGETHER FOR HOME ELDERCARE

AJJ and HUAXI are working together to bring HIT-2X to homes in Singapore. The collaboration combines local healthcare experience with robotics and AI to support older adults, families and caregivers in everyday life.

HUAXI Core Technologies

Large Multimodal
AI Models

Reinforcement
Learning

The collaboration connects product technology with practical home-care needs. AJJ contributes local market understanding and customer coordination, while HUAXI contributes robotics development and technical support.

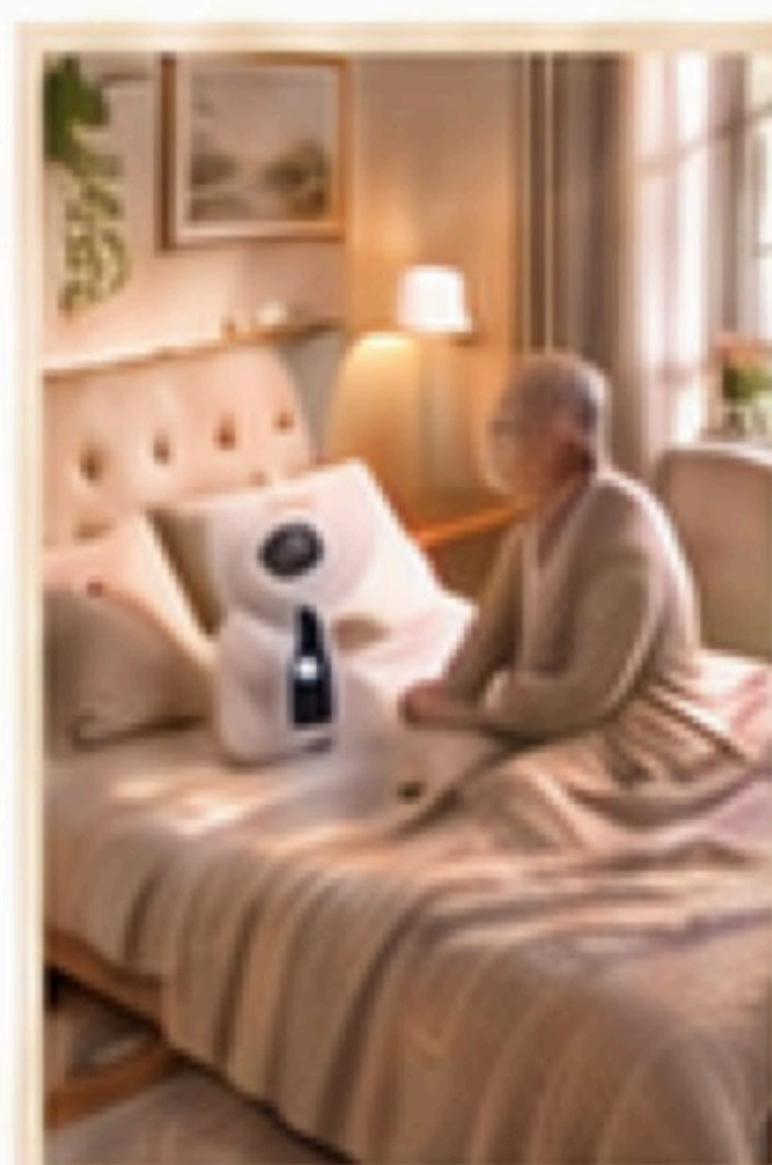

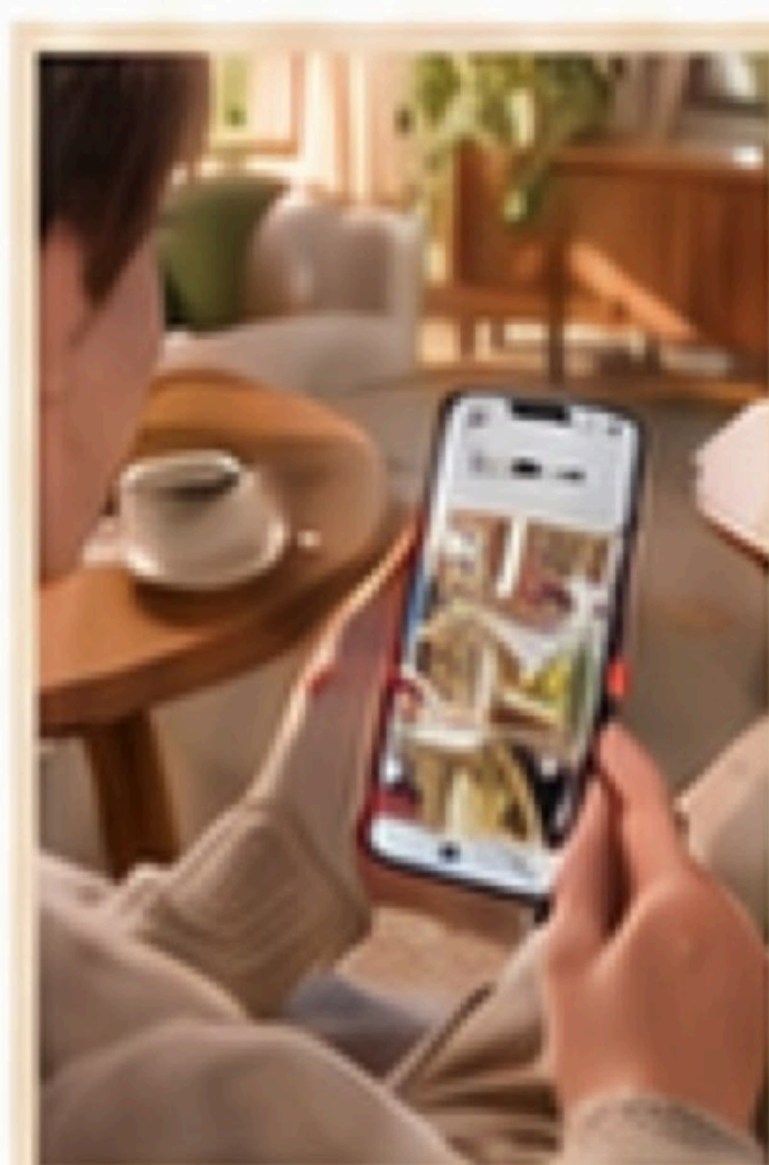

Together, the companies are developing a coordinated approach to product introduction, user guidance and service support for the Singapore market.

**Embodied AI for Eldercare,
Powered by In-House Core Technologies**

Technologies developed for care settings are adapted to the needs of the home, bringing intelligent interaction and practical assistance into daily life.

HIT-2X combines companionship, health-related support, safety features and family connection in one home eldercare platform.
